

Ovid[®] Nutrition and Health

An interdisciplinary A&I database focused on diet and health enabling in-depth, targeted research across multiple academic disciplines.

The database for the health and wellness community

Ovid Nutrition and Health (also known as NutriHealth) is a specialist resource developed by the International Food Information Service (IFIS) to meet the information research needs of the medical nutrition community.

This interdisciplinary database explores the intricate relationship between diet and health, covering research fields ranging from clinical nutrition, nutrition therapy, pharmacology and medical sciences to public health and policy. It encompasses a wide array of topics such as the prevention and treatment of obesity, diabetes, metabolic disorders and other noncommunicable diseases (NCDs) alongside research on allergies, immunology, the microbiome, mental health, cognition, and more.

Built using the world's largest thesaurus of food and health sciences, Ovid Nutrition and Health is a carefully curated digital library of 500,000+ records that have been collated, summarized and indexed for efficient search and discovery. Updated weekly, it delivers the latest global developments in dietary sciences from publishers across 89 countries, bringing together content originally published in 41 languages.

Ovid Nutrition and Health has been expertly indexed by the team of food and data scientists at IFIS Publishing. Sources are thoroughly checked for relevance and screened for predatory content, ensuring a reliable repository of scientific research and other valuable information.

The database stands as a comprehensive and trustworthy tool for those engaged in the dynamic field of health and nutrition research.
